

NVIDIA: Free AI Courses to Supercharge Your Skills in 2025

NVIDIA is a global leader in **AI computing** and **graphics technology**. Known for its **cutting-edge advancements in AI, deep learning, and GPU technology**, NVIDIA is driving innovation across industries. To help entrepreneurs and professionals stay ahead in the **AI-driven future**, NVIDIA offers **free, high-quality AI courses** through its **Deep Learning Institute (DLI)**.

These courses cover **everything from AI fundamentals to advanced generative AI techniques** and are perfect for **entrepreneurs, developers, and business owners** looking to **leverage AI** in their businesses. Here are **9 must-take courses** to boost your skills in **2025**:

9 NVIDIA AI Courses You Don't Want to Miss in 2025

1 **Getting Started with AI**

Build and train a classification dataset and model with the NVIDIA Jetson Nano.

This course introduces you to **AI fundamentals** and provides hands-on experience with **AI model training** using the **Jetson Nano**, a powerful AI development platform.

 [Take the Course](#)

2 **Accelerate Data Science Workflows**

Learn to use RAPIDS to speed up your CPU-based data science workflows.

Discover how to **accelerate your data science projects** by using **RAPIDS**, an open-source suite of tools designed to **optimize data processing and analytics**.

 [Take the Course](#)

3 **Generative AI Explained**

Learn Generative AI concepts and applications, as well as the challenges and opportunities in this exciting field.

This course provides an **overview of Generative AI**, its practical applications, and the **ethical considerations** surrounding its use.

 [Take the Course](#)

4) Building a Brain in 10 Minutes

Explore the biological inspiration for early neural networks.

Learn the **history of neural networks** and how **biological systems** have inspired modern AI development.

 [Take the Course](#)

5) Augment Your LLM Using RAG

Learn about Retrieval Augmented Generation and how it improves Generative AI.

This course covers **Retrieval Augmented Generation (RAG)**, a technique that enhances **Large Language Models (LLMs)** by integrating **external knowledge**.

 [Take the Course](#)

6) Building RAG Agents with LLMs

Deploy an agent system in practice.

Gain hands-on experience in **building and deploying RAG agents** using **Large Language Models** to create more **intelligent AI systems**.

 [Take the Course](#)

7) Mastering Recommender Systems

Explore strategies employed by NVIDIA's Kaggle Grandmasters.

Learn from **Kaggle Grandmasters** who secured top positions in data science competitions by mastering **recommender systems**.

 [Take the Course](#)

8) Perform Large-Scale Image Classification

Discover advanced techniques for large-scale image classification.

This course dives into **advanced image classification techniques** used in **large-scale AI projects**.

 [Take the Course](#)

9 Building Video AI Applications

Learn how to build DeepStream applications to annotate video streams.

Discover how to use **NVIDIA DeepStream** to create **video AI applications** that can **process and analyze video streams** in real time.

 [Take the Course](#)

Why Take These Courses?

- **Learn from AI industry leaders** at NVIDIA
 - **Completely free and accessible** to all skill levels
 - **Hands-on, practical courses** to apply AI in real-world scenarios
-

Bonus Course: AI Entrepreneurship for Business Growth

Want to learn how to **apply AI** to start or grow your business? Check out the **AI Entrepreneurship Course**, where you'll discover how to use **AI tools** like ChatGPT, MidJourney, and Canva to build **profitable, scalable business strategies**.

What You'll Learn:

- How to create **AI-powered content** in minutes
- Building a **personal brand using AI tools**
- **Social selling strategies** for entrepreneurs
- **Monetizing AI knowledge** for passive income

 **Enroll Now – [AI Entrepreneurship Course](#)**

*Note: This bonus course is hosted on **Thinkific** and offers lifetime access to enrolled students.*
